# Discover

**Educational Experiences for schools, students, business and community groups.**

**SharpFutures is a social enterprise based at The Sharp Project, Manchester's flagship digital production facility.**

Manchester is Europe's second largest Creative Digital hub including everything from Film and Television, to Gaming and App Development - creating an estimated 70,000 employment opportunities in Digital, Creative & New Media.

SharpFutures deliver a variety of innovative Creative Digital packages at The Sharp Project and The Space Project, to help young people to get an insight into the variety of careers available in this growth sector, and discover the opportunities of working in the Creative Digital sector.

SharpFutures offer young people, schools and parents the opportunity to:

- Get an insight into the kinds of Creative Digital opportunities
- Take part in hands on activity, and
- Learn about Creative Digital careers.

**➤ SEED**

**➤ NURTURE**

**➤ GROW**

**SharpFutures is a Creative Digital agency that supports young people into employment.**

**Don't forget, you can share any of these experiences with another local school. Contact SharpFutures for more details**

The students loved the experience day and were really considering what they could do with their futures - which is superb. The day was great for inspiring our students and widening their knowledge base about the jobs that may be available to them in the creative digital sector, while giving them a glimpse into what that could look like.

SharpFutures have access to a range of pioneering creative digital businesses based at The Sharp Project and The Space Project. On your Creative Digital experience day, you will get to experience the world of work in this ever-growing sector. As well as a tour around The Sharp Project or The Space Project plus a Creative Digital careers overview, you can also add on some bespoke, hands on workshops ran by professional businesses in the Creative Digital sector. These workshops are:

### **LOGO AND BRANDING DESIGN**

Students given a real life brief and get to make their own logo

### **GREEN SCREEN JOURNALISM**

Present your own news report as a director and presenter

### **FREELANCE PHOTOGRAPHY**

Learn the importance of lighting how to take the perfect shot

### **CODING ACTIVITIES**

Using Rasperry Pi's, have a go at Scratch, Python and Sonic Pi

### **DIGITAL & VIRTUAL REALITY FORENSICS**

Real life CSI in Manchester with expert witnesses

### **GAMING AND VR**

Discover cutting edge new gaming technology

It was fun and informative, it was beneficial to see all the different careers available in the creative industry. It was a fantastic opportunity and opened my eyes to all the different jobs and uses in creative media.
